**RESPONSE UNDER 37 C.F.R. 1.116**

Mail Stop AF  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

**REMARKS**

Applicant has reviewed the Final Office action mailed March 25, 2005. No claims are amended, canceled, or added; as a result, claims 1-21 remain pending in this application.

**Specification Objection**

Applicant respectfully submits that the specification does provide enablement commensurate with the scope of Claims 1-2, 4, 8-9, 11-12, 15-16, 19-21, as was discussed in detail in the previous response dated 5 January, 2005, which is incorporated herein by reference, for at least the following reasons and respectfully requests that the objection be withdrawn.

The Examiner states on Office Action page 2, third line that “a capacitor” is not found in the specification. Applicant respectfully disagrees and submits that on page 6, line 2, with regard to the embodiment of figure 1(b), it states the “... deep trench capacitor...”, which fulfills the enablement requirement for the selected embodiment of claims 1-21. Further, the recited “parallel buried conductive elements” may be found on page 5, line 27 and in figure 1(b). This was discussed in the previous response dated 5 January, 2005, to which the Examiner has not responded other than by stating on page 9 that “there is support in the embodiments of figures 1(a), 1(c) and 2a-2b for the claimed limitations, as recited in claims 1-2, there is not support in the elected embodiment of figure 1(b)”. Applicant has shown above that the limitations of claim 1 are clearly enumerated in the very section of the specification’s discussion of the embodiment
